

GOLDEN EQUIPMENT

PRECISION. EFFICIENCY. CONTROL.

Serving the plastics manufacturing industry for more than 30 years

SERVICE KNOWLEDGE VALUE

“We help our customers make a profit by increasing the number of good parts they can produce while decreasing the attention they have to put toward the process.”

Jeff Golden

The Golden Difference

Bringing the best of the world to the Midwest

GOLDEN EQUIPMENT delivers. Golden suppliers build excellent equipment—and most importantly when you're in the middle of a critical run—they provide support you can depend on. Jeff Golden knows his business, and he knows yours, too. He focuses on improving manufacturing processes by starting with the parts you need to make and the equipment you have on your shop floor. Golden salespeople want to know what your goals are, how your process works today, and what you would like to see in productivity over the next four quarters and beyond. Then they find the best new equipment to fit what you have and what you want to do. Service. Knowledge. Value. That's the Golden Difference.

Our Suppliers

Piovan

Piovan Group is the worldwide leader in supplying ancillary equipment, engineered solutions and services to the plastics industry. Representing the state of the art in drying systems for preform, Piovan dryers reduce the cost for good preform to a minimum level, reducing waste of material due to scrap, lowering energy consumption, and lowering labor costs.

Una-Dyn

Universal Dynamics, Inc. is a leader in the design, manufacture, and installation of auxiliary products for the plastics processing industry. Through decades of innovation, expertise and product excellence, Universal Dynamics has produced an extensive product line from dryers to material handlers, feeders, size reduction and more.

HYRobotics

HYRobotics, the largest manufacturer of robots in

South Korea, builds robots for plastic injection molding machines. Their range of products is designed to apply to any process, from completing simple tasks like removing parts to providing fully integrated factory automation systems.

Plastrac

Plastrac is an American firm that builds systems for material blending and loading. They focus on providing their customers with hardware that is accurate, reliable, affordable, easy to use, and easy to maintain. They are the most reliable in the industry.

Niigata

Niigata USA's Injection Molding Division offers a line of plastic injection molding machines built on a foundation of solid Japanese-designed and built machines. The all-electric MD Series combines small size with powerful injection even at low speeds. Established more than 120 years ago, the Niigata brand has a global reputation for reliability and performance.

Our Suppliers

Aquatech

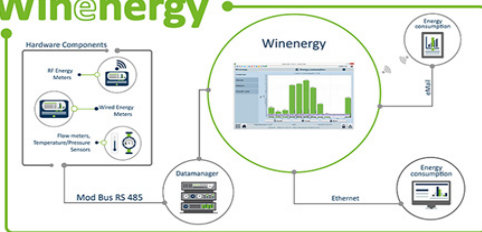

Founded in 2015, Aquatech offers the best in industrial cooling system solutions.

The Aquatech advantage lies in a drive for high-efficiency, dependability, reliability, and advanced technologies for cooling systems. Part of the Piovan Group, Aquatech is known globally as a name signifying performance and quality in the industrial processing sector.

Winenergy

Energys

Established in 2012, Energys has a focus on energy efficiency, offering manufacturers solutions designed to lower expenditures in a measurable way and offering white certificates to their clients. Energys, acting as a certified ESCo in accordance with UNI CEI 11352:2014, can manage projects required to receive energy efficiency certificates.

Woojin

Woojin Plaimm designs and manufactures hydraulic, electric, two-platen, and hybrid injection molding machines. The company's machines provide energy savings, ultra high-speed options, and dual-color models, in sizes ranging between 30 and 3,500 tons.

FDM

FDM was founded in 2003 and since has grown at a high pace, developing technologies totally focused on innovative methods of production for plastics manufacturing. Being part of the Piovan group further strengthens FDM. Collaboration is key to achieving the best for the customer, and to build a line of highly efficient products.

Penta

Penta designs, manufactures, and installs systems for the transport and handling of materials and for production automation. Thanks to the experience gained in the installation of thousands of systems, Penta is a qualified partner in the automation of bulk materials such as powders, granules and flakes, used in industrial sectors where efficiency, flexibility and reliability of the process are fundamental prerequisites.

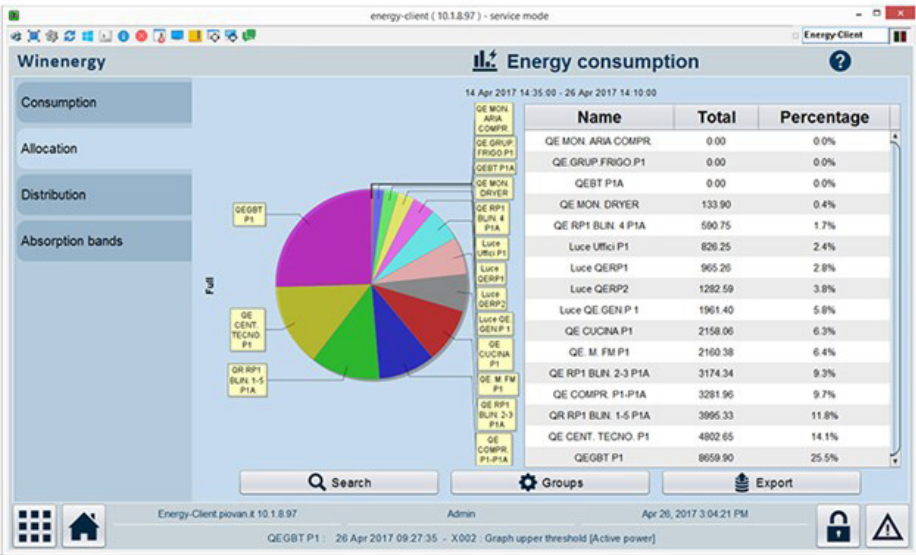

Focus on Energy and Production Monitoring

Energy management and monitoring is critical to running plant and equipment at peak cost efficiency. Regardless of the energy source now and in the coming years, plastics manufacturers of all sizes and types need to manage energy well and control its costs.

Golden Equipment suppliers provide sophisticated production and energy management tools to help ensure operating efficiency.

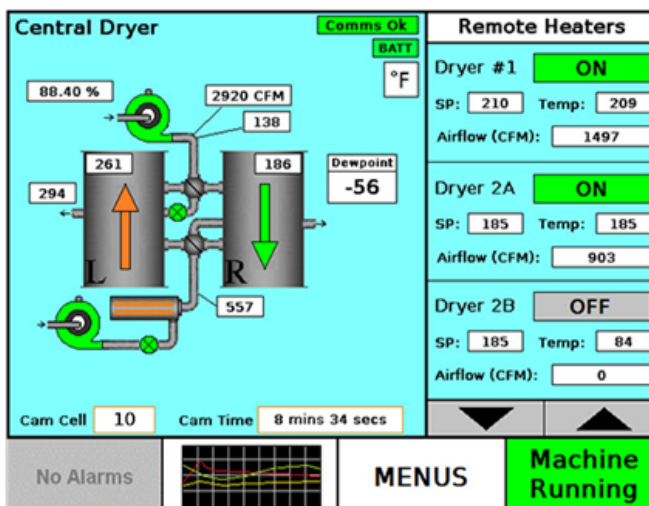

Piovan WinEnergy

Energys energy efficiency monitoring and analysis systems measure energy flows, enabling you to identify energy inefficiencies throughout the plant. The system acquires information on electrical energy, thermal energy, fluid and gas flow rates, and temperature.

Una-Dyn Focus Controller

Una-Dyn's FOCUS series controllers provide a complete view of dryer operations, including temperature and operating efficiency.

EPIE

A South Haven, Michigan, water engineering firm, EPIE designs and builds custom energy recapture systems. These systems convert heat from water used in cooling throughout a plant into on-site generated electricity, reducing overall energy costs.

““

Jeff Golden is a driven individual who continuously looks for ways to bring value to our corporation. He frequently checks on our current equipment needs, and approaches the business relationship as a partnership. I have called on Jeff for his expert opinion, and have been pleased with the unbiased information he provides. You often times hear the term “trust” tossed around for those in sales. I can say with confidence that Jeff is an individual that I trust.””

Project Engineer, Wisconsin

““

Jeff knows his products. He doesn't push unneeded equipment, and he also checks back periodically to make sure that everything is working as expected.””

Engineering Support Specialist, Minnesota

““

I buy injection molding drying equipment from Jeff. The dryers are excellent. Jeff is knowledgeable about the product that he sells. Jeff is personable and listens well to concerns I may have.””

Manager, Minnesota
